

A subjective and objective exploration of the student's visual capacity...

CREATIVE VISION

A graduate level Brain Gym® course with Don Wetsel, L.Ac.

August 5 – 7, 2016 Staunton, Virginia

- Gain new understanding of how vision and movement relate to learning and other life skills.
- Experience dynamic personal growth and change in your vision of life.
- Receive new and expanded understanding of the pre-checks and educational opportunities in laterality, centering, focus and motivation dimensions.
- Acquire the knowledge, hands-on practice and confidence necessary to make Creative Vision an integrated part of your Edu-K consulting.

"Vision is a mental act, dependent upon how we perceive the world and interact with it."

–Paul Dennison, Ph.D.

About the Course

Creative Vision presents an exploration of vision and the relationship of vision to movement, academic skills, other senses and the accompanying foundational kinesthetic skills developed in infancy and early childhood.

The *Creative Vision* workshop provides a structure to improve visual information processing by unveiling hidden perceptual gifts blocked by the survival mechanism. It provides a tool for the release of inefficient visual habits including visual and postural compensations and the re-establishment of whole brain visual processing. It utilizes the advanced Educational Kinesiology (Edu-K) process in its intrinsically non-intrusive manner that recognizes that each person's adaptation to his or her life experience is part of a complex and personal pattern.

Techniques you will learn

- In-Depth Vision Training
- Homolateral Reflex Repatterning
- Movement Re-education of the scapula, neck flexors, and eye muscles.
- Edu-K eye points
- *And much more!*

Creative Vision presents a subjective and objective exploration of the student's visual capacity, and has consistently met with very enthusiastic responses from course participants.

Don Wetsel, MA, L.Ac, NCTMB. *has studied extensively with Dr. Paul Dennison. In addition to Edu-K In-Depth, he teaches Brain Gym®, Visioncircles, Optimal Brain Organization, Movement Re-education, Creative Vision and Touch for Health®. His extensive training and experience in functional aspects of both western and energetic anatomy and physiology allow him to embody these concepts and effectively teach them to others. He becomes passionate when these concepts become creative and transformational in the Educational Kinesiology 5 step balance process. Don enthusiastically shares his vision of a world where learning is fun and easy. He supports each individual to develop fully and embody excellent health and emotional and spiritual well being.*

August 5 - 7, 2016

Course Location: Staunton, Virginia, Class size is limited! Please register early.

**Fee: \$450, when \$100 non-refundable deposit is received by July 15, \$500 after July 15.
